5. CONCLUSION: 3

1.PROJECT OVERVIEW:

Stock Sphere Intelligence is an interactive inventory management dashboard developed in Microsoft Excel through SQL Queries. It helps businesses monitor stock movement, inventory value, product performance, reorder requirements, and transaction analysis through dynamic KPIs, charts, slicers, and Pivot Tables. This project demonstrates practical inventory reporting skills commonly required for MIS Executive, Reporting Analyst, and Junior Business Analyst roles.

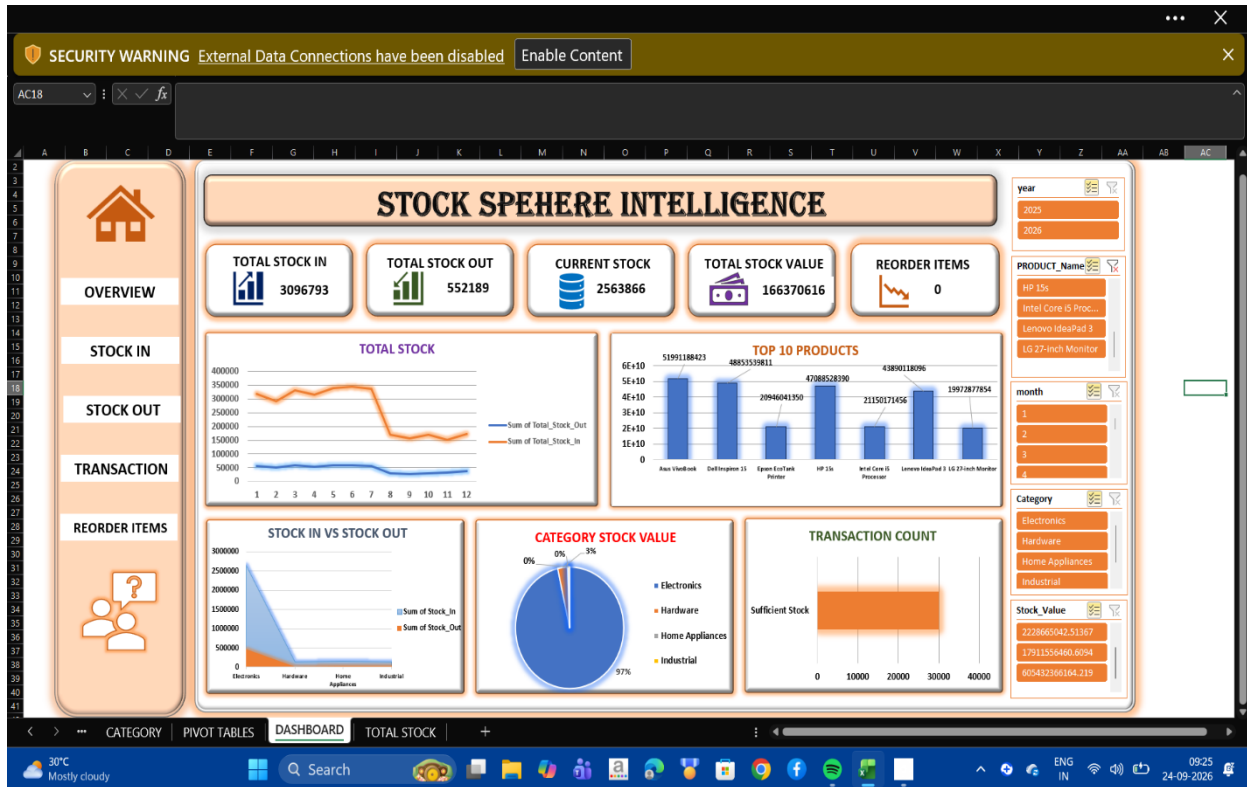

2. KPI CARDS:

KPI	DESCRIPTION
Total Stock In	Total Quantity of products received into inventory
Total Stock Out	Total quantity issued or sold from inventory
Current Stock	Available inventory after Stock In-Stock Out calculation.
Total Stock Value	Total Monetary Value of available inventory.
Reorder Items	Products that reached or fell below reorder level.

3. VISUALIZATIONS AND INSIGHTS:

TRENDS	CHARTS	DESCRIPTION
Total Stock	Line Chart (12 months)	Monthly Stock In vs Stock Out trends.
Top 10 Products	Columned Bar Chart	Highest stock value products.
Stock In vs Stock Out	Area Chart by Category	Inventory movement comparison.
Category Stock Value	Pie Chart	Stock value distribution by category.
Transaction Count	Bar Chart	Number of inventory transactions.

4. DASHBOARD:

5. CONCLUSION:

Stock Sphere Intelligence is an interactive inventory dashboard built using SQL and Microsoft Excel. It provides real-time insights into stock movement, inventory value, and product performance through dynamic KPIs and charts.

The dashboard helps monitor stock levels, identify reorder items, and analyse category-wise inventory trends.
